DETAILED ACTION

Response to Amendment

1. This is in response to the Amendments filed 12/16/2004.
2. Claims 1, 7, 11, and 17 are currently pending in this application. Claims 1 and 11 have been amended.

Specification

3. In view of the prior Office action of 8/12/2004, the objection of the disclosure has been withdrawn due to the Amendments made thereto.

Claim Rejections - 35 USC § 112

4. In view of the prior Office action of 8/12/2004, the rejection of claims 1, 7, 11 and 17, under 35 U.S.C. 112, first paragraph, has been withdrawn due to the Amendments made thereto.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1711

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1, 7, 11, and 17 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 5, 8, 10, 15, and 17 of copending Application No. 10/074,827. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the copending application contain the subject matter that is narrower in scope than that of the instant claims, rendering them obvious over each other.

Claims 1, 5, 8, 10, 15, and 17 of the copending application disclose all of the limitations recited in the instant claims. Claims 5, 10, and 17 of the copending application disclose the second electrode with a front section and a tail section located at an angle to the front section, that would read upon the tail extension in the instant claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
